Psychological and educational

Medical and health improving (recreational)

Technical maintenance

Social
115 students graduated from the professional education program:
- 96 students graduated from secondary professional education programs.
- 19 students graduated from higher professional education programs.

Now there are 243 students in the program:
- 60 students – according to secondary professional education programs.
- 183 students – according to higher professional education programs.
The Academy of Management “TISBI” has formed and is effectively using the system of continuous professional education for deaf and hard-of-hearing students.

The social status of deaf and hard-of-hearing students in the professional education program became higher.

There is a necessity to consolidate the resources of state, business communities and public organizations to provide deaf and hard-of-hearing people with affordable high quality education.
